

## INTRODUCTION

StorWall is the smart alternative to joinery when it comes to integrated floor-to-ceiling filing and storage systems. It creates limitless fitout alternatives and provides the easiest way to tailor just the right combination of specialized types of storage to cater for individual needs. Matching low-height and specialist modules are also available.

## FEATURES

- StorWall's simple but elegant lines will compliment any office décor
- Internal fittings are interchangeable with other Dexion Office products
- The modular design of StorWall allows the system to be fully relocated or reconfigured
- Use free-standing, against walls, or to completely replace partition walls
- Dual-access and two-way corner units are available
- StorWall is adjustable at floor level
- All StorWall carcasses are constructed from robust powder-coated steel, with quality hinges, locks and runners throughout
- Low height and wall-mounted modules are available to provide fitout consistency
- Special features include desk, fridge and coat modules
- Scribe and blind panels provide an excellent finish
